***Allowable Subject Matter***

2. Claims 19-38 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowability of claims 19-23 is the inclusion therein, in combination of the limitation of a hinge for use in a micro-assembly comprising: an electrical conductor material carried on at least a portion of the upper outer surface of the ribbon hinge structure. This limitation is found in claims 19-23 and is neither disclosed nor taught by the prior art of record, alone or in combination.

The primary reason for the allowability of claims 24-36 is the inclusion therein, in combination of the limitation of a micro-assembly comprising: an electrical conductor material extending along an upper outer surface of the ribbon structure. This limitation is found in claims 24-36 and is neither disclosed nor taught by the prior art of record, alone or in combination.

The primary reason for the allowability of claims 37-38 is the inclusion therein, in combination of the limitation of a micro-assembly comprising: an electrical conductor material extending along the anchor portion and an upper outer surface of the ribbon structure to make a connection with the electronic device. This limitation is found in

Art Unit: 2831

claims 37-38 and is neither disclosed nor taught by the prior art of record, alone or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### ***Response to Arguments***

4. Applicant's arguments and amendments filed December 1, 2003 have been fully considered and finds the argument along with the amendments to the claim persuasive. Examiner agrees that prior arts do not teach of an electrical conductor material on at least a portion of the upper outer surface of the ribbon hinge structure.

#### ***Conclusion***
